

PROJECT PROFILE

The Capital Grille

Atlanta, GA

OVERVIEW

The Capital Grille is a nationally renowned restaurant in the heart of the Buckhead district in Atlanta, Georgia. When it came time to expand and add offices to their current location, the only way was up...to the roof. While enclosing the space was no problem, providing a level surface onto the existing rooftop was not so easy.

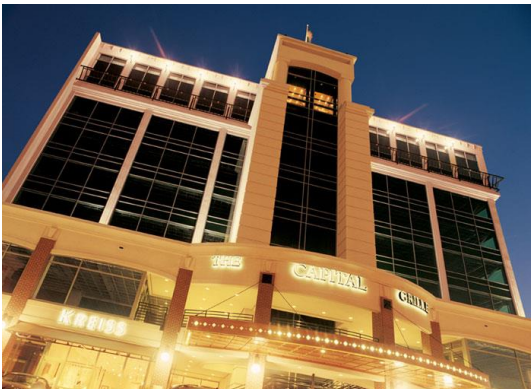

PROJECT DETAILS

With the rooftop now the 7th floor, a strong, yet lightweight floor needed to be installed before work could seriously begin. Facing a tight time frame for completion, our partner Complex Group LLC, Georgia got the call for the project.

SOLUTION

Complex selected **AccuLevel® G50** thanks to its superior performance and affordability. Because it's engineered with polymer modified portland cement, AccuLevel® G50 requires little, if any prep to the substrate. Just clean, prime and pour, saving time and money. Best of all, AccuLevel® G50 does not require sand. Just add water and pour!
